## Working in Partnership

At The Insurance Partnership, we like to keep our clients and prospective clients abreast of the continuous and complex UK legislation. With this we try and offer the solution and protection where we can.

By law, electrical systems must be maintained to prevent risk of injury in the workplace. Regular safety inspections and testing will aid in the continued safe operation of electrical systems and equipment and also ensure that you comply with your insurance policy warranty and conditions.

With this in mind, The Insurance Partnership has negotiated an exclusive facility with our partners, The Beaumont Group, to provide a discounted Inspection Service for our clients.

The Beaumont Group, a UK based business with over 50 years of experience in the industry, employ over 100 engineers across the UK with offices in Hull, London, Manchester, Glasgow & Haywards Heath. They aim to provide you with experienced engineers offering innovative solutions to minimize your down-time, simplify operations and give you the peace of mind knowing that your workplace is safe and compliant.

We have provided you with a brief summary of the inspections required. By filling in the prepaid reply card and returning it to us we can arrange for an engineer to call you to discuss your requirements.

### **The Beaumont Group can also help you with:**

- ▶ Electrical Service Maintenance
- ▶ 24/7 Emergency Work
- ▶ Special Project Work
- ▶ Approved Warranty Work
- ▶ Installation: Domestic and Commercial
- ▶ Light Refurbishment
- ▶ New Equipment Wiring
- ▶ Refrigeration and HVAC Wiring
- ▶ Major Refurbishment
- ▶ Fire Alarm Installation/Maintenance
- ▶ Electrical Compliance Testing

Types of Machinery/Plant Requiring Inspection	Inspection Frequency (Months)	Type of Inspection	Relevant Legislation and/or Guidance
